PACER INSIGHT

Students deserve a voice in applying activity fee

presently working on a referendum which, if passed, will undoubtedly rank as their main achievement for the entire year

The referendum will provide for a new student activity fee probably under \$10 per

Most college campuses already have this activity fee- many of which are four or five times greater than the one presently proposed

It may result in free Sunday night movies free Spirit yearbooks, big name concerts every quarter at drastically reduced prices for the student, greatly improved cultural programs and many other things for the student's benefit

The need for a UTM student activity fee is obvious. Its tremendous benefit to every student and to campus life in general is also

The fee, if passed, will generate over \$100,000 next year to be used exclusively for student activities not to pay for the buildings on campus or offset rising operating costs of non student organizations

There is, however, another consideration to this student activity fee

A direct relation exists between the size of an organizations' budget and the amount of responsibility that organization must bear especially if it is a student organization spending the students' money

No one group should have a controlling in terest in this large amount of money

The need for an activity fee committee should be obvious. This committee should have representatives from all affected campus factions-including the student body

Fortunately, the SGA is already considering such a committee. It is hoped that this will soon

All in all, the student activity fee for UTM is an excellent idea but only if this money is applied wisely and in the best interests of the

Student thieves abound: cafeteria is prime target

Vanguard earns praise

Stealing, or borrowing something with no intention of returning it, is rampant on the UTM campus, and although one may not realize it, serious repercussions will come about, sometimes in unexpected ways

The UTM cafeteria is the hot-spot for thieves.

or long-term borrowers. Students going there can help themselves to any number of utensils. including trays, plates, glasses and silverware without getting caught. The cafeteria per sonnel are aware of this problem but with so many students taking eating utensils. Joe Perdue and his staff are unable to righteously point a finger at any one individual. They have to compensate for the stolen items, so the best course of action open to them is to raise the cost of the food that already costs a lot. The

Vanguard has done it again. Another quality

hurt the Soviets most in two areas. Number one, he feels that the Americans' not being at Moscow will disallow the Soviets the opportunity to spend their propaganda. propaganda can only affect those with the willingness to listen in the first place.

Number two, Carter hopes to hurt the Russians in the pocketbook. It has been estimated by ABC News that the Russians stand to lose \$100 million by America's withdrawal. According to Time magazine, NBC's contract alone is \$275 million. Couple this to over \$100 million American tourists have thrown in on tickets and tours and it seems that America stands to lose the most in this

President Carter also seems

by Bob Livingston classes for them. Or C. They pay professors for the grades they receive. These are the only possible explanations since studying is against the Fraternity Code of Ethics.

There is good reason to wonder what is wrong with Greeks on the UTM campus because they violate two of the most sacred folkways of the First, one must campus. wonder what those Greeks are up to when they stay in Martin during the weekends. Could it possibly be to undermine the image of the best "Suitcase College" around? Heaven forbid!

Second, there must be something wrong with students who would rather sit with friends in the cafeteria than to sit alone. After all, this time could be better spent contemplating the probability that a steak-umm is actually a reincarnated box flap.

l would like to personally thank Ms. Allen for informing me that no intelligent conversation goes on at the ''Greek Tables'' in the I had almost cafeteria. convinced myself that a conversation last week at those dreaded tables with a professor really had some We discussed an meaning. upcoming field trip to the Appalachian Mountains by the geology department, which, as we all know, could have no educational benefit whatsoever.

Have we really stopped to think of the economic disaster that would befall our country if the fraternity system was eliminated? The distributors of those evil liquid spirits would be forced into bankruptcy because, as we are well aware, independents never touch alcohol. One may observe this point clearly by counting the number of independents at open fraternity parties and at bars throughout Martin any night of the week. Also, the makers of "Havv-aball" social glasses would be devastated not to mention the companies who produce these obnoxious hieroglyphic jackets. No. Greeks are not perfect

but then none of us is. How can you condemn something you do not fully understand? As Leonardo da Vinci once said, "You do wrong if you praise, but worse if you criticize what you do not really understand." really Stereotyping is the quickest way to find yourself wrong about a group of people. P.S. Those alligators which

appear on sweaters across the designer trademark, but rather membership pins to a highly organized underground fraternity for elite college students nationwide. And you thought you knew everything

FEEDBACK

'Violent revolution' distorted term

Sometimes I really believe that there should be two editions of The Pacer per week-the second serving largely as a forum for those wishing to reply to the first. Realizing the time and budgetary limitations, I do not propose that this be done. However, it does seem unfortunate that one must wait a week to reply to some of the things he finds in It. Some of them are, in the strictest sense of the word, unbelievable,

A case in point is last week's lead editorial on the Board of Trustees. The closing statement of that editorial told us that the current composition of the Board of Trustees is "grounds for violent revolution." tainly hope this is merely an example of poor word selection on the part of the author. But I fear otherwise, as the job of an editor is, presumably, to guard against just such an inappropriate selection of words.

I also thought that editorials in The Pacer were supposed to reflect the majority opinion of the editorial staff. Is this really the case? I certainly hope not. The justification of "violent revolution" is more than passing strange in a newspaper whose editor-inchlef just a few short weeks ago was reminding us of the immorality of going to war or doing anything to impose our will upon those who are not 'committed" to it.

Aside from the thesis of the editorial, which states that the University should be largely governed by the students (1'm

not at all sure that a university should be a democracy, but that's beside the point), the belief expressed is another case of faith in the end justifying the means. philosophy was certainly espoused by V.1. Lenin, Josef Stalin, Adolf Hitler and Mac Tse-tung, and is apparently accepted by the Ayatollah Khomeinl as well, but was rejected by Jesus Christ, St. Paul and others of that era who faced a Roman govern ment which was, to say the least, considerably more severe than anything ever devised or contemplated by the Board of Trustees.

Another distressing aspect of the editorial is that It contains gross factual error, which is inexcusable in any newspaper claiming to print the truth. The vast majority of support for this University, as well as for all other public institutions of higher learning in the state, comes from the taxpayers, not the students. To call the current situation "taxation without representation" is to grossly distort the rallying cry of the Founding Fathers. If the Board should be set up in such a way as to give the largest bills, then the current system is most sufficient.

Perhaps suggested in the editorial is a plausible, even a constructive, idea. But as long as the advocates of this Idea are associated with "violent revolution." then they, along with all their ideas both good and bad, are doomed to a certain (and well-deserved)

Dormitory Rules 'simply obsolete'

Ever since your paper's article on dorm rules I have noticed a definite increase in the enforcement of the present rules. Enforcement of rules that are outdated, outmoded.

and simply obsolete. I came to college like most students not simply for an education but for an outlook into what I'd be facing In the quote "real world." apparently this college isn't interested in the real world or just doesn't care! The administration is so caught up in this Bible belt society that they don't believe twentyyear-old adults know what's right or wrong. We (the students) don't know how to handle liquor, we don't know who we should be able to have in our rooms (that we incidentally pay \$250 a quarter for) and we don't know how to

lock our own doors (this is

around the dorm because the doors that we come in by are locked).

Nonetheless this state seems to think we know how to handle liquor at the age of 19 and the U.S. government wants to bring back the draft showing their belief that we are responsible enough to fight and get killed for our country at the early age of 18.

In conclusion I picture the average college student as a very mature person, a person who learned the difference between right and wrong before reaching college. If the administration in its infinite wisdom wishes us, the student body, to act as responsible adults then they should look into treating us as such. Changing the present dorm policies would be the begin-

ning of that wish.

Kenneth M. Insco

My peers, they all dctest me. They treat me like a pest; A worm, the scum, a nuisance, Some animal, at best. Oh, tell me, someone, why they don't Just treat me like the rest?

They congregate about me To scorn from night till noon. I just can't understand why they Would comment "What a goon!" 'Cause all I do each night at twelve Is howl at the moon.

Events round out the quarter

SGA Dateline

By the time you read this, you should be beginning your big sigh of relief, for classes at least are just about over Exams, however, are the big worry, and there are still at least a few planned events upcoming that might ease

The long-awaited Molly Hatchet concert will be held this Saturday night, March 8 in the fieldhouse at 8:00. The warm-up group will be Architect from Paris. Tickets will be on sale through Friday at the Information Desk for

\$5.50. The price at the door

will be \$6.00 This concert falls on a good night right in the middle of the break between classes and finals. Everyone is encouraged to come out.

Next week on Monday evening, March 10, the cafeteria will sponsor 'Western Night.'' From 4-7

both by special plate and a la carte will be served. The plate consisting of Bar-B-Que Pork, Baked Beans, Corn on the Cob. Mexican cornbread and slaw will sell for \$1.75. There will also be western decorations and entertainment provided. You are invited to wear your jeans, cowboy hat and boots to join in the good time. A special thanks should go Food Services Committee of

p.m. a special western menu.

by David Griggs the SGA Congress for their efforts in coordinating this event. It should provide an excellent "study break" for finals week.

Since this is the last dateline of the quarter, SGA would like to wish everyone a pleasant spring break. We've had a

enjoyable Winter Quarter and hope that you have too. Be careful and come

'On the waterfront'

Mystic

Thunder roiled across the sky and lightening could be seen for miles around iiluminating everything and everyone for the faintest race of time. Thieves lurked near down the dark, gloomy street overlooking the river. The before I saw the establishment I sought. Had it been daylight and nice weather I wouldn't have ventured ten miles within this place but the glow placed upon the massive structure before me seemed to have an

showed me I was indeed in the Taking a deep breath, and nearly choking on my gum, I climbed the stairs and opened the door. Normaily I would have knocked first but this piace was enough to make the originator of etiquette hasten to enter into another world

The inside of the building belied the outward appearance. While the outside was tall and forbidden looking with chipped paint and warped shingles, the inside was as cozy as my home back

"Well, what can I do to you? asked a voice that was soft and friendly although its sudden appearance startled me Yalk paine, here to learn about my future and...uh...I was told you would Little did i know that my show

heip me." Her name was Hilda and she was a i magician , though many called her a witch. She served hot, spiced tea and small cookies while we talked about me, her, the weather and anything else we could think of. While eating, sipping and talking simultaneously the room got darker, her voice voice seemed to come from a mile away, and I got very tired. The rest of that trip is vague but, dear reader, here goes to the best of my ability.

All around me, the once cozy room with papered walls and thick shag rugs had a different appearance. It was awfully hard to breathe because my environment was enclosed in plastic, though some foiks cail it plexi-glass. Also, my entire body had taken on a different appearance. Instead of usual tan (peach if you wili) skin and blond hair, I was now covered with fur the color of a peanut and, egads, a tail! What would my friends say if they saw me? I'd be the laughing stock of the whole

'Heh, heh, heh, well iittle one, did you find out what you wanted to know?" Horrified and almost insane I was determined to show her what I thought of her joke, if that's indeed what it was. The most vulgar words ever muttered by mankind were on the tip of my tongue but another surprise presented itself when ali I could utter was squeaks. Me, the loudmouth of all times. reduced to squeaks! The thought so angered me that I felt my tail begin to stiffen as my hackies began to rise.

by Dorothy Bock

of anger would in no way frighten the woman since I was only three inches tall with teeth no bigger than the tip of a ball-point pen and not much

"Well, you little fool, I guess I need to name you," the woman said. "You resemble a hamster except for that long tail of yours but you are the color of a peanut, so I'll name you peanut." Rising up on my

hind legs I again attempted to curse her out of the room, but again the only sound that escaped was a faint squeak which bounced off the walls of my cage and nearly deafened

My captor, though minus a few marbles upstairs, was a decent human and to show her affection she reached into the cage, picked me up by the tail and after clasping me in her immense hand, began to stroke my head. Enough this crap I said to myself.

Even though I was a gerbil, I still had ail of my brains and the will to return to life as a college student studying Journalism. Thanks to the tender pudginess of her hand and my semi-sharp teeth, I escaped and dodged back to the area I wanted desperately to return to.

Relax, gentie reader I'm back to normal but my little adventure taught me a vaiuable lesson. Don't try to change who or what you are, but merely try to improve what you have. And never. ever go to the waterfront to discover your future, its a rattrap that'll change you

Part III— the getaway

Conclusion

Synopsis of the tale thus far: In the previous two instaliments of this three part series I revealed how I, Chief Dogman for the K-9 Corps of the United Mercenary Strike Force, had been chosen to represent the UMSF in one of its more daring missions: the abduction of the Ayatoliah Khomeini and his replacement with Lewis, a

I chose the mutts best suited for the operation, Lucky Charlie, Vincent and Rastus, and off we went to Iran where we joined forces with Lewis.

Last week's installment ended when we stole Khomelni and replaced him with Lewis.

The bullets flew thick as hail as I and my fellowsoidiers fought to retain our grasp on life. A company of Iranian infantry, pursulng us from Tehran, had driven us to a hill scarcely a dozen miles from the city. I thought of Lewis with envy. The goat was now secure in the knowledge that he was the chief holy man in Iran, while myself and three dogs were involved in a life and death struggle with what appeared to be half the

Would that I were a goat! But I am not, and forsooth never was, and I knew that wishful thinking would avail me nothing in the face of such horrendous odds.

We owed our present predicament to Lucky Charlie's love of Tequila. The little Chihuahua had, unbeknownst to myseif, smuggled a supply of the Devil's drink from the States to Iran and, when the Ayatollah Khomeini was made secure, he took a victory drink. One swallow led to another, and soon the dog's of firewater was exhausted, as was his store of common sense. He was so uninhibited, in fact, that he threw a grenade into the midst of a gathering of the enemy as we were steaithily trying to leave town, thus initiating an enraged pursult.

Khomeini was in the bag. To be more specific, he was bound, gagged and piaced in a feedsack, from which there was no escape. Or so I hoped. He and his feedsack presently occupied a hastily dug foxhoie to the rear of our position. I wanted to lie in a foxhoie myself but there was time ough to dig only the one, and General Smith had been very adamant on one point: Bring the rogue back alive. there's one thing the General can't stand it's a dead hostage, so Khomeini got to occupy the position of honor.

Bugles sounded, Rastus howled and I swallowed my Copenhagen as the foot vour ground," I instructed. "Don't fire unless fired up-hoo!" A bullet carried away the tip of my nose and I fired, frantically levered another cartridge into the Marlin's chamber, and fired again.

Vincent sniped, Rastus machine-gunned and the now sober Lucky Charite huried sticksof dynamite, the fuses of which he forgot to light. The United Mercenary Strike Force in action! The charge succumbed to our impenetrable defense and I breathed once more as the Iranians scurried down the

I pulled a tick from my moustache and considered the situation. The Iranisns knew not that we'd abducted their beloved leader or surely by

now they'd have cailed in reinforcements. Apparently they still considered us smalltime miscreants and were not willing to risk expending more than a company of soidiers in our desth or capture. cause was not yet lost if the dogs and I could survive the fray with our and Khomeini's skins reasonably intact.

"Don your ANBC CArmoured Nuclear ANBC Biologicai Chemicai) gear, boys!" I yeiled. "This time when the beggars charge we'll make them glow like the hands on a luminous wrist-

I quickly heiped the dogs into their ANBC units, then likewise covered myseif. Khomeini's feedsack was not armoured, but it had been treated to withstand the effects of nuclear failout, so he was reasonably secure.

As the heathens massed for the assualt, I fed the Mariin's magazine with cartridges containing the Geneva Conention outlawed Mother Warbritton's Nuclear Speciai bullets. I treated the Ruger in like manner, then stood ready to repel the invaders.

Up the hiii they came,

sending leaden messengers before them. The builets glanced harmiessly off my armour as I gleefuily laughed and sent a miniature nuclear missile amongst them...

Talk about consternation! The enemy in the rear glowed like iightbuibs as those to the fore disintegrated. The few survivors scattered like sheep in the midst of wolves. I began a victory chant and the dogs chimed in:

Wherever troubied winds

we'll nuke the knaves tili

fright them, fight them till they flee

do away with the enemy! Howl, howi, arf!

We made haste to leave the battlefield. We ran at a good clip for some 27 miles before I decided we were far enough removed from the nuclear destruction to remove our ANBC units. After discarding the protective gear we ran another 50 miles or so before it occurred to me that I had absolutely no idea of where we were running to.

I queried Khomeini as to the best means of leaving his

Straight from the heart

House call

People ask a lot of questions about running and the beart. Here are a few of them and some answers:

Q. Does running cause an enlarged heart, and is this dangerous?

A. There are two kinds of heart hypertrophy or enlarge-ment. A detrimental kind from pressure overload is caused by high blood pressure. Having to pump against too high pres-sures in the arteries causes the comes stretched. This attempt at compensation weakens the heart and can lead to heart attack

A beneficial kind of hypertrophy comes from volume overload with endurance exercise such as running or bicy-cling. As more blood is pushed through the heart, it adapts by growing larger and stronger. Both muscle mass and chamber size increase so that more blood can be pumped more forcefully with each centrac-

Echocardiographs of marathon runners and other endur-ance athletes indicated heart mass was greater by about 50 percent. Tests of professional cyclists showed average heart weights of 18 oz. instead of the usual ii oz. Four tandem bike riders who crossed the United States in 11 days had hearts 30 percent above the norm in chamber size

Q. Is the enlarged "athlete's heart" a danger to the person who stops exercising?

A. There is no evidence to support the old myth that having once had a well-conditioned heart is ever detrimental to an individual. It is true, however, that benefits of endurance training do not continue once the training stops.

Q. How does endurance exercise-the kind that raises the heart beat continuously for 20 minutes or more-make the heart work better? A. Heart efficiency is af-

fected by three factors: the volume of blood that can be pumped (which is affected by heart size and strength), the pulse rate and blood pressure in the arteries.

Physical conditioning lowers both resting and exer-cising heart beat since the heart can move more blood per contraction. It also rests longer between beats. This is important since the heart has more time to take in its own nourishment from oxygen and nu-trients supplied by the blood

during this interval. The heart's work load is reduced when blood pressure is low. Many studies show activity can lower blood pressure.

Q. Is exercise testing a measure of heart efficiency? A. Stress testing on a treadmill or bicycle ergometer of-

about heart action. But level of performance is also affected by how well the leg muscles are

Physical conditioning, be sides strengthening the heart, increases certain enzymes that allow muscle cells to utilize oxygen provided by the blood. With more of the oxidizing enzymes, the trained muscle can make better use of oxygen from any given amount of

by Betty Kirk

blood. Q. Does regular running

prevent heart attacks?

A. There is a fair amount of idence from population and other studies indicating active people have fewer heart attacks than sedentary people. They also show that when active people do suffer a heart at-tack their chances of surviv-

ing are much better.
But runners and other endurance athletes do have heart attacks. Many other factors are involved, among them, diet, blood pressure and to-bacco and alcohol use.

Some experts think high levels of exercise are very pro-tective. Other authorities feel that, while exercise helps prevent heart disease, many people who already have silent heart disease are competlng in various events. No level of activity can guarantee that these people will not run into trouble.

in Martin.

Bedlam

I know that I should not write about sleeping since l know so little about it, but I certainly say that I'm almost an authority on the places a person can sleep or at least lay throughout the night.

My latest experience was on the floor of the First Methodist Church with the wind whistling under the door paralyzing every muscle in my body so that I had to be pried up off the tile the next morning. I was in a kiddie sleeping hag that was a foot too short and six inches too thin. As I was tossing and turning wondering why ln the world Methodists made floors so hard, I thought of the other piaces I had slept in my

iifetime One night my sister and I spent the night with two friends who were also sisters and who also had relatives sieeping over. In order for everyone to have a place to sieep, we four siept in the back of their station wagon. No cover, no blankets, no mattress, no pillows-just us and the mosquitoes. Every bone in my body pained me the next morning, and I couldn't even scratch the mosquito bites for lack of energy from loss of Even my eyelashes sleep.

The next time we spent the night with them, we all four slept in the same bed. (All iittie giris like to be together.) I siept at the foot of the bed until I had all I could stand of foot odor. I then moved into a "normal" position and we ail four slept on our sides. The one on my right had porcupine iegs that she hadn't shaved in a month and the one on my left kept her elbow rammed into my pancreas and her two-inch toenails dug into my leg. I felt like I was in a Chinese torture chamber. I managed to roll over and the porcuplne woman fell out on the floor.

It was at this point we decided to sleep in the loft.

Now this was not an attic, mind you, it was a loft. Did you ever try sleeping crossways on two by fours? It's

great fun-until I got up to go to the bathroom and feil through the ceiling, quite conveniently into the commode, feet first of course. Then there was the night my sister and I slept on the

'I love the night life'

couch—the one that doesn't make a bed. My head was at one end and hers was at the other.' That worked very weil except she kept kicking me in the head. I woke up the next morning with two black eyes and again, a mouthful of foot, Once I slept on the ironing board which fell ail of five

times before I ever got it adjusted properly. That was "real." I couldn't toss and turn as much as I liked, but my dreams about falling off buildings took on new dimensions. Those stories about hitting the ground in a dream and dying are just not true. I'm aiive to prove it.

Sleeping on the piano bench is smillar to sleeping on the floor except somehow, in my case, my feet rested on a wall socket that had an exposed cord plugged ln it. If lightening had struck me I couldn't; have been more startled.

One night I siept with a frlend who insisted on sleeping with her dog. I don't mean a house dog, peek-a-poo or whatever. I mean a DOG. It was one of those that had chased rabbits all day and was ready for a nsp. He laid between us with ali fours suspended in the air, except for habitual scratching every 15 minutes. Every time I tried to kick him out of bed, he would growl and snap at me. My friend would say in a highpitched voce, "Twat's wong baby?" I took a two-day bath In listerine after that ad-

Chaplain exhorts cadets

By BARRY WARBRITTON

LTC Marion R Kirk Brigade Chaplain for the Second Brigade of the 10ist Division (Air Airborne Assualt) of the U.S Army challenged UTM Army ROTO cadets to be technically and tactically proficient, men tally, tough, physically fit and spiritually sound at the annual military dining-in held last Friday at 6:00 p.m in the University Center Ballroom

In an interview following his speech, Kirk said that an individual can accomplish whatever he desires if he measures up in those four

Kirk has had ample op portunity to measure up to those standards, as he has successfully completed Ranger Training, Basic Airborne and Jumpmaster Training, Special Forces (Green Beret) Training. Jungle Operations and Jungle Air Assualt Training and is a graduate of the Air Assault School located at Fort Campbell, Ky.

"As a chaplain the opportunity afforded itself for me to be able to go to Ranger School," Kirk said. "I wanted to see if it was really as tough as they said and it was, and then some. And that's why I mention the fact about not only being physically fit, but in order to make it after nine weeks of 'Hey, we don't need you here, we've got plenty of Rangers' you've got to be mentally tough. And then as you pushed yourself and pushed yourself to the end. you reach down into

something else. "I remember an opportunity of having a service in the hand-to-hand combat pits and young lieutenant came up to me and said 'Man, Chaplain that's really weird' and I said 'Well, it was the only place where we could sit down and get away with it."

the situation with something even more' and that's where the term spiritually sound is

derived from," Kirk said Kirk said that while stationed with the Special Forces in Panama he encouraged soldiers to become proficient in these four areas People stomp grass of leadership

"I used that as the basis for one of my duty-day retreats for these guys with the Green Berets and people couldn't believe that a chaplain could get away with that with a bunch of guys with Green Berets," Kirk said "But when you know what's inside and scratch the surface and put away the facade and the airborne stuff and all the things the big macho image points out to and tap the real person, then you really test him out with the Ultimate

Kirk, who served a two-year enlistment as an infantryman, a drummer in the First Infantry Division Band and as a chaplain's assistant, said that to do his job as a pastor and as a chaplain on active duty he needs to know the

soldier's job well.
"I've been there with them, I know what it is to hump and make it, to be hurt, to have friends fall by the wayside and I think I have an opportunity to say something," Kirk said.

"I couldn't miss the opportunity to speak to these students about the responsiblity that's laid on us in the Officer's Corps under the Oath of Allegiance that we as leaders are representatives of the president of the United States.

completed Kirk dergraduate studies in psychology and philosophy at Wartburg College in Waverly, Iowa, then received an MS degree at Long Island University in guidance and counseling and is presently nearing completion of a Doctor of Ministry program at Vanderbilt University

during the 9 a.m. program. Some of the topics discussed were the economic outlook for the beef cattle, wintering cows on crop residues, cow management and health.

Huey P. Claybrook of Martin, George C. Davis of Union City and Bob F Page of Dresden, three practicing West Tennessee veterinarians discussed herd health and disease problems.

Good luck on your finals and have a nice Spring Break

Campbell featured at Oz; Karate lovers take heed

Marshall Campbell, head instructor of all Go-Jo-Ryu karate systems in the United States will be featured along with UTM karate students in several matches tonight.

The matches will be held at the OZ Disco between 8 and 9 p.m. and the winners will receive amateur standing and state ranking, according to Glen Campbell, coordinator of student under Master Umipeg of the Phillipines and founder of Okinawian Go-Ju-Ryu has had 11 years of karate training.

Demonstrations by the students will include boardbreaking, weapons and self defense, according to Glcn

Marshall Campbell, former said the students had been training for a long time for this match.

Each was required to fight Glen himself in order to qualify for the program.

Key bangers

Students participating in the

program Include Debbie Jennings and Shaun Cummings in self- defense. Hondo Perez in weapons along with Campbell, presently a David Wakecaster, Rufus karate instructor at UTM, Flag and Lawrence Flagg

Footpaths cross campus

"We have planted shrubs, trees, grass, put up fences and signs, moved benches and bicycle racks in the way, but people still use the paths,' said Robbins.

The paths change from quarter to quarter as class schedules change, and students use different routes as shortcuts. But using one of the many sidewalks on campus may involve only taking five or ten extra steps. and in many cases the sidewalk is the quickest way

from one place to another. However, in a few cases, the

paths are the gulckest route to a building. Specifically, using one of the paths from the northeast wing of G-II Hall to the University Center is quicker than using the sidewalk But, according to

> sidewalk and steps are to be made up the bank to the University Center. taken by students that detract

> Robbins, plans are being

made to correct this. A

In most cases, though, the aths are unneccessary routes from the beauty of the campus. The paths will be there as long as students continue to use them, but, as Robbins stated, "I hope a lot of people will take a few extra steps and let the grass grow.

Chaplain

LTC Marlon R. Kirk, Brigade Chaplain for the Second Brigade of the 101st Airhorne Division of the U.S. Army, relates some of his Army experiences to cadels at the annual ROTC mllitary dlning-ln iast Friday. Kirk, who is Ranger and Special Forces qualified, challenged cadets to become technically and tactically proficient, mentally tough, physically fit and spiritually sound. Kirk, who served two tours in Vietnam, has many scholarly credits to his name and has been decorated many times by the Army.
